DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-19 rejected under 35 U.S.C. 103(a) as being unpatentable over applicant's admitted prior art (APA') in view of Leyva et al. (US 6,327,405).

APA' [figure 2A] discloses a basis temperature compensating device. However Kuhne does not disclose a mount includes first and second towers.

Leyva et al. discloses devices and methods for temperature compensated fiber optic comprising a mount [31, figure 1] includes first and second towers.

It would have been obvious to one having ordinary skill in the art at the time invention was made to modify the device of APA' to provide the mount as taught by Leyva et al. for the purpose of facilitating the mounting and retaining of the fiber.
